Consistency instead of conformism

Being committed to the big picture in a consistent and goal-oriented way by no means rules out a distinct individual appearance. On the contrary. Glasses from MBM underscore your desire to be seen and heard. The frames are available from selected opticians.

INTRODUCTION COLLECTION MATERIALS MANUFACTURE CARE CYCLE

Innovation & heritage

MBM glasses are individually crafted by hand from sustainable materials in the Mangfall Valley in Upper Bavaria, Germany. Innovative, processes developed in-house are used to ensure durability and a first-class wearing experience.

WOOD – NATURE AT ITS BEST

Six styles, three colour themes and a natural, unique texture and colour – each pair of MBM glasses is a unique and treasured specimen. Something that only you have. And each of our masterpieces deserves a case that has also been perfectly crafted by hand.

M49 ACETATE - PURELY ORGANIC

Carefully extracted from organic materials, M 49 acetate entices from its low weight, high dimensional stability, and particularly refined appearance. You can choose from six beautifully shaped frames in stunning colours or classic shades such as black or havana – each one a handcrafted one-of-a-kind.

Local wood

No deforestation in the tropics, no environmentally harmful long-haul transport. When it comes to our wooden frames, we only use local, certified wood from sustainable forestry. We create a symbiosis between valuable, top class walnut and oak, the epitome of elegance, strength, and durability.

THE HEART

Like the heart of a living creature, the hinge is vital for a pair of glasses. Our wooden glasses are unique thanks to our patented, resiliently folding, metal-free hinges.

A technical masterpiece, crafted with the highest precision from the horns of Indian water buffalo. Since these animals are regarded as sacred in India, the horns for the hinges is only obtained after their natural demise.

M49 ACETATE

M 49 cellulose acetate is made from renewable raw materials by the traditional Italian manufacturer MAZZUCHELLI, mostly by hand. This organic material impresses with its classy look, trendy colours, and dimensional stability. A masterpiece made of acetate!

High Tech & Craftsmanship

At our production site in Bavaria, we show that home and high tech aren't necessarily contradictory. On the contrary, we are breaking new ground in manufacturing and product development.

Despite their filigree construction with a weight of less than 10 g, our wooden glasses feature high stability. The perfect temple adjustment enables the highest degree of wearing comfort thanks to the wood treatment process developed in-house.

Easy to clean

Simply wipe your wooden glasses from MBM with a soft cloth from time to time. Your MBM optician will be happy to check your glasses regularly and subject them to more intensive cleaning.

The hinges will be grateful when you apply horn cream at least once a year.

M49 acetate frames are suitable for everyday use and very easy to care for. An occasional ultrasonic bath lets our glasses shine again.

Give and take

Ever more and always faster and cheaper belong to the past. We now know that resources are finite and that one day we will have to give back to the Earth what we take from it. And that there's a good reason for the price of valuable things like a really good pair of glasses.

What really counts

Let's summarize. Natural materials, local production in the Mangfall Valley, the shortest possible transport routes, sustainable manufacturing, a long service life thanks to top quality and being easy to repair, optimal recyclability – from an environmental perspective, all of these argue in favour of MBM eyewear. And for the people who wear them...
